Resolved

Part I : Isophotal Aperture Photometry (Fourier Expansion)
Axis ratio, Boxy/Disky A_4 , PAs, ... as a function of radius
(F160w and F125w)

Part II: Elliptical Aperture Photometry
(the fixed centre, axis ratio, and PA)

- 1. Multi-wavelength surface brightness profiles**
- 2. Rest-frame colour profiles from EAZY code**
- 3. Stellar mass & SFR profiles from FAST code**
- 4. Cumulative magnitude and mass profiles**

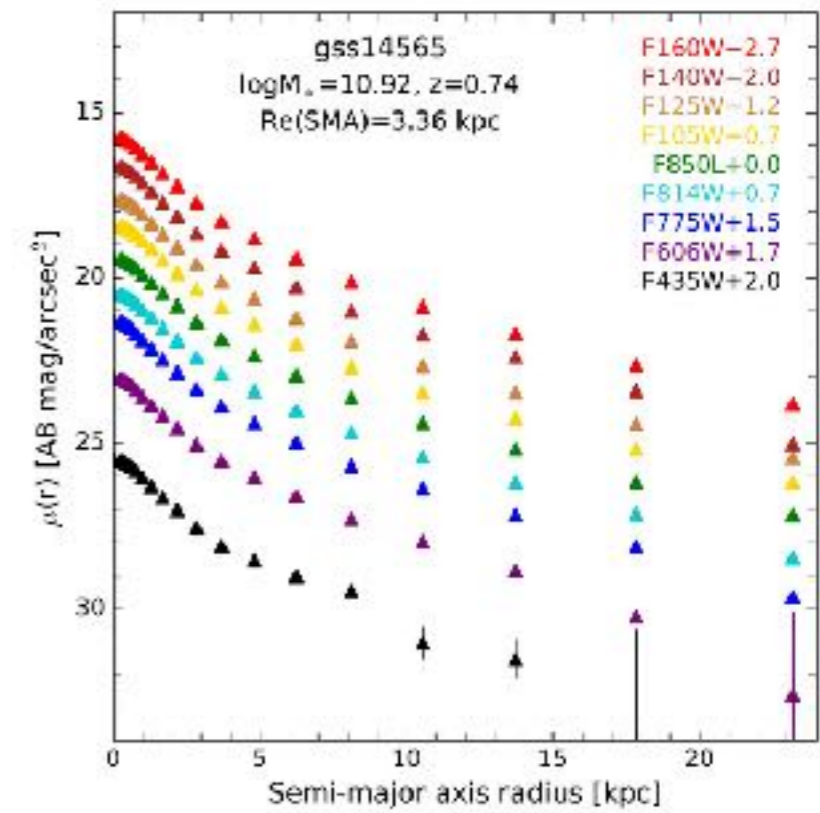

**(GOODS-S & GOODS-N: 5 ACS + 4 WFC3 bands
UDS, COSMOS, EGS: 2 ACS + 3 WFC3 bands)**

Part II: Elliptical Aperture (fixed centre, ellipticity, PA) (Examples of Quiescent Galaxies)

GOODS-S UVJ-classification: quiescent galaxies ($10.5 < \log M^* < 11, 0.4 < z < 2.2$); imaging size: 80kpc X 80kpc

Part II: Elliptical Aperture (fixed centre, ellipticity, PA) (Examples of Quiescent Galaxies)

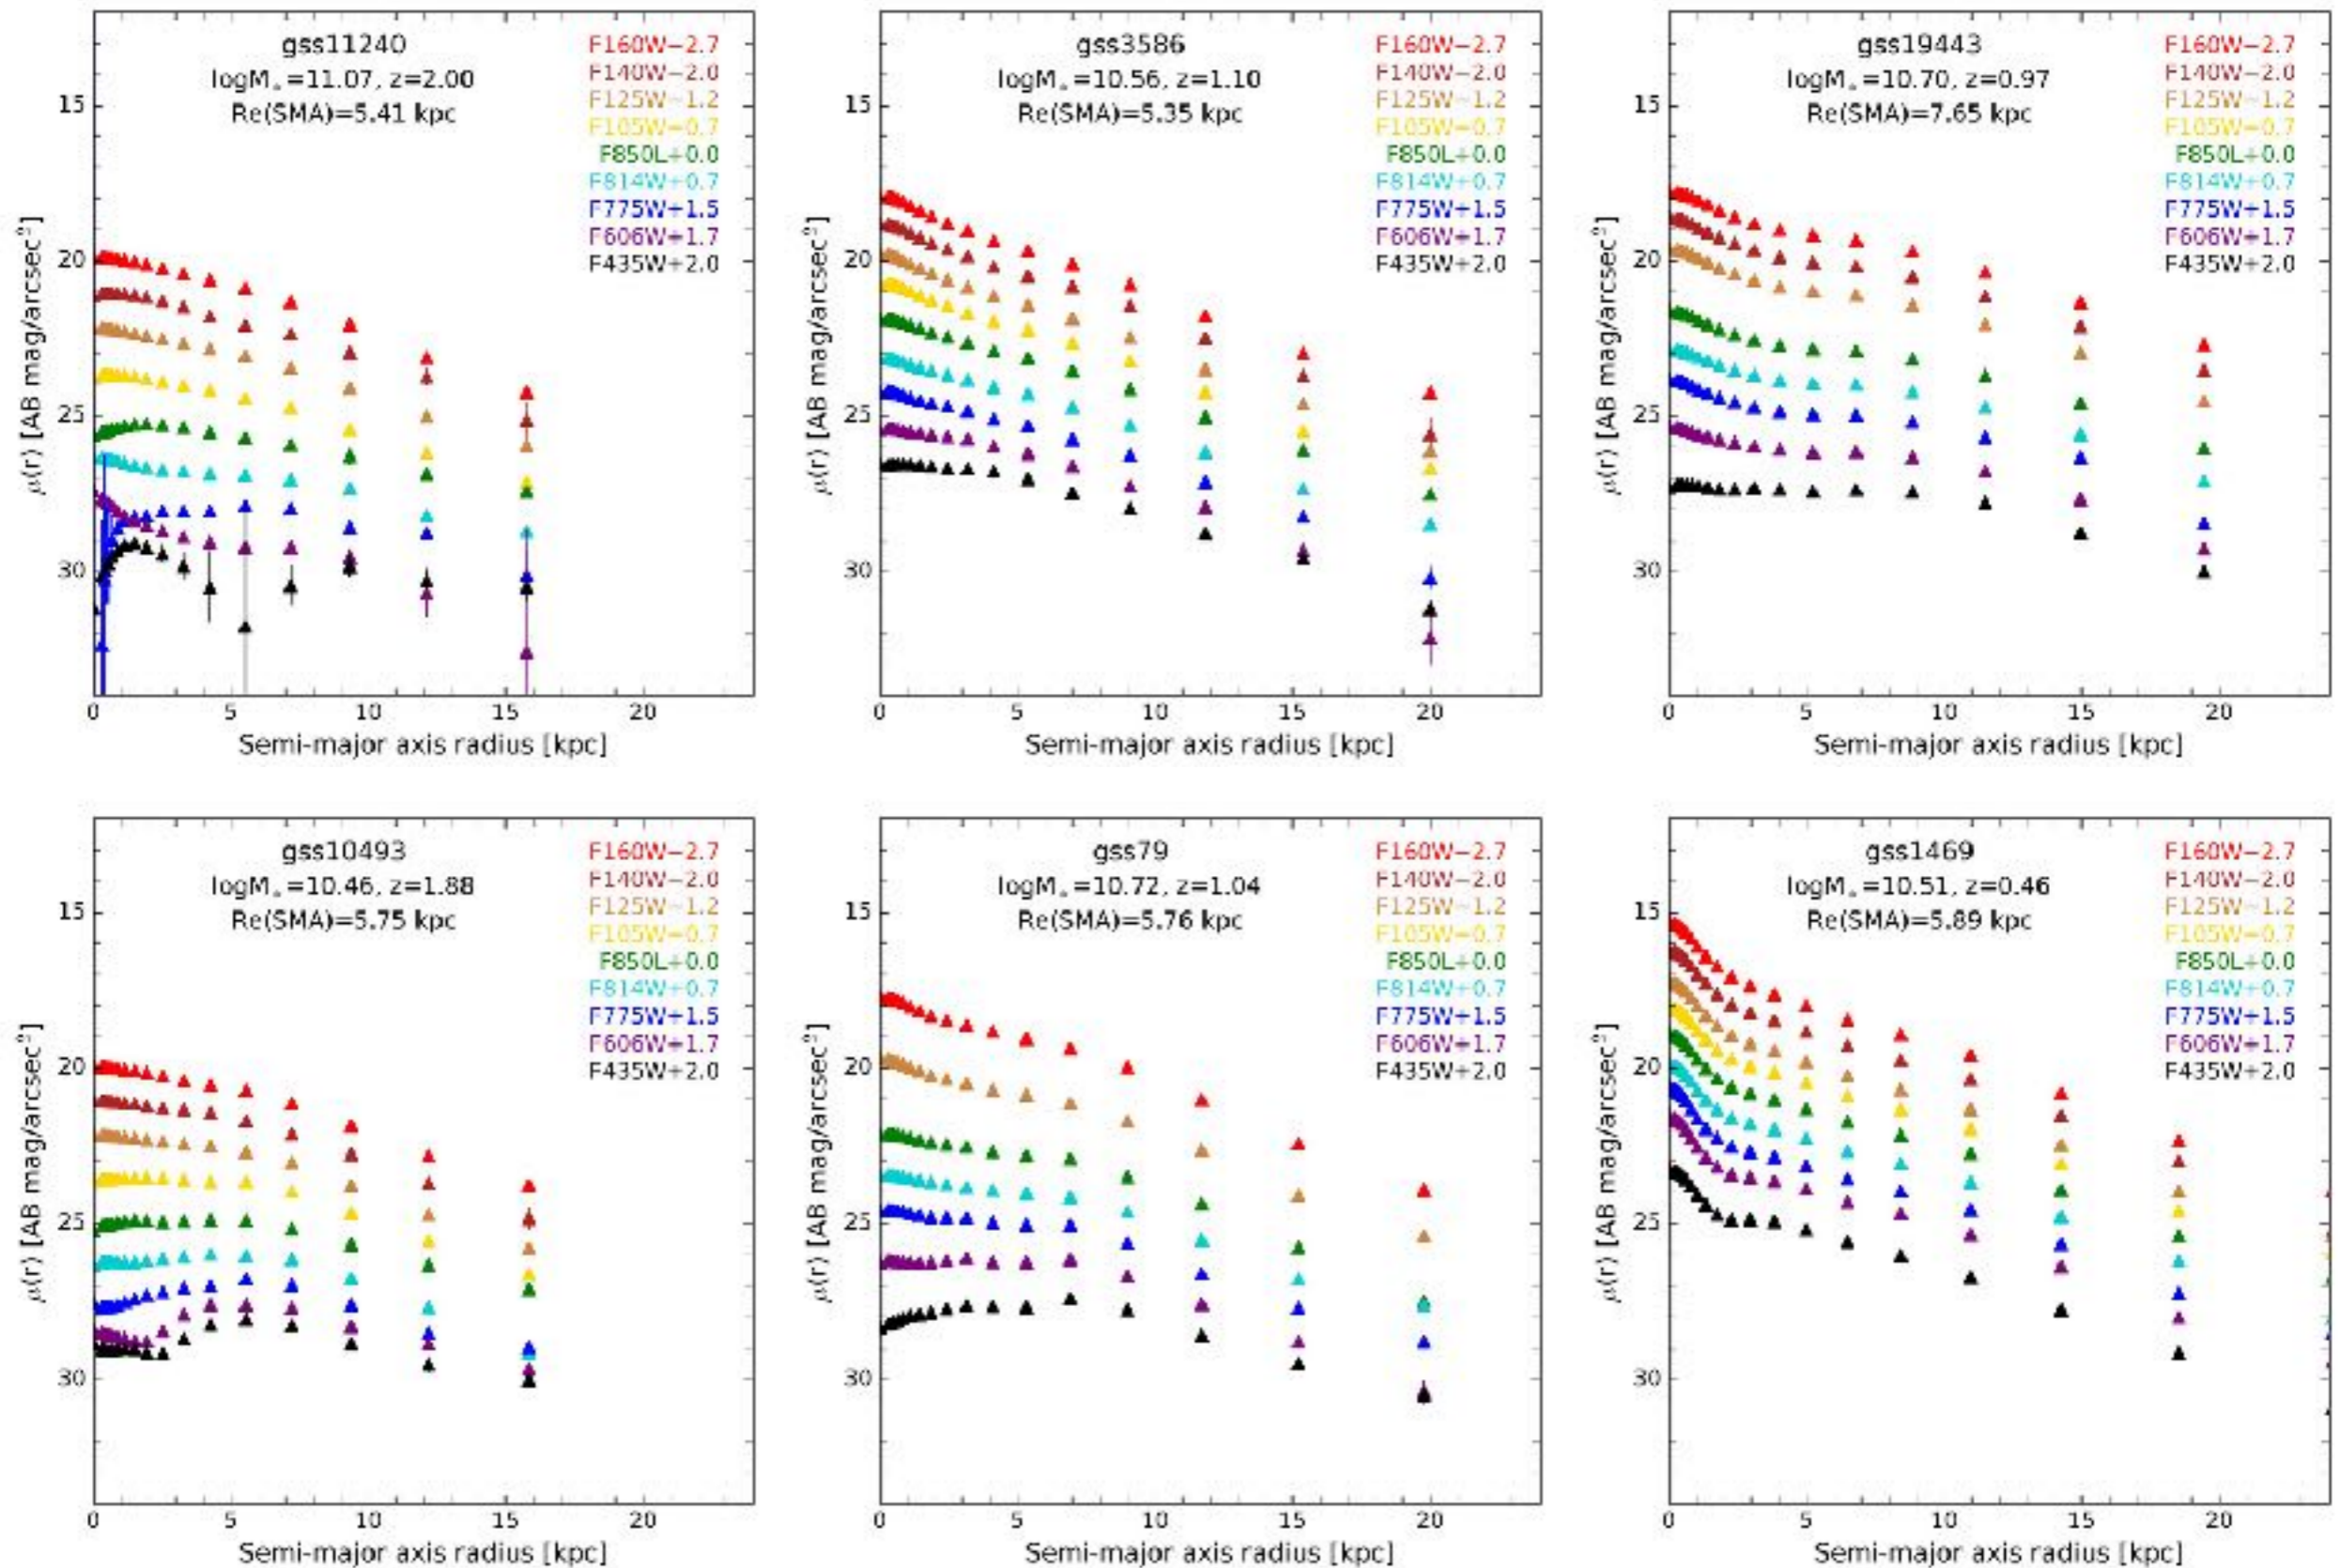

Part II: Elliptical Aperture (fixed centre, ellipticity, PA) (Examples of Star-Forming Galaxies)

GOODS-S UVJ-classification: star-forming galaxies ($10.5 < \log M^* < 11, 0.4 < z < 2.2$); imaging size: 80kpc X 80kpc

Part II: Elliptical Aperture (fixed centre, ellipticity, PA) (Examples of Star-Forming Galaxies)

What we have done & What we plan to do

1. Jiang Dongfei, Liu F. S., et al. 2017a, submitted to ApJ, “The Isophotal Structure of Star-Forming Galaxies at $0.5 < z < 1.8$ in CANDELS: Tracing the Buildups of Central Bulges and Outer Stellar Halos”
2. Jiang Dongfei, Liu F. S., et al. 2017b, in preparation, “The Resolved Stellar Population of the Outskirts of Star-Forming Galaxies at $z \sim 1$ ”
3. Jia Men, Liu F. S., et al. 2017, in preparation, “Spatially-resolved Star Formation and Structural Changes from the Blue Cloud to the Red Sequence at $0.5 < z < 1.4$ ”
4. Liu F. S., Jiang Dongfei, Faber S. M., et al. 2017, ApJL, 844, 1, “The Origins of UV-optical Color Gradients in Star-forming Galaxies at $z \sim 2$: Predominant Dust Gradients But Negligible sSFR Gradients”
5. Liu F. S., Jiang Dongfei, Guo Y., 2016, ApJL, 822, 25, “The UV-Optical Color Gradients in Star-forming Galaxies at $0.5 < z < 1.5$: Origins and Link to Galaxy Assembly”
6. Wang Weichen, Faber S. M., Liu F. S., et al. 2017, MNRAS, 469, 4063, “UVI colour gradients of $0.4 < z < 1.4$ star-forming main-sequence galaxies in CANDELS: dust extinction and star formation profiles”
7. Barro G., Faber S. M., Koo David C., et al. 2017, ApJ, 840, 47, “Structural and Star-forming Relations since $z \sim 3$: Connecting Compact Star-forming and Quiescent Galaxies”
8. Barro G., Faber S. M., Dekel Avishai, et al. 2016, 820, 120, “Caught in the Act: Gas and Stellar Velocity Dispersions in a Fast Quenching Compact Star-Forming Galaxy at $z \sim 1.7$ ”

These spatially-resolved datasets would be potentially a valuable and new resource to study galaxy evolution over cosmic time with the CANDELS, which will be useful for a wide range of science!

Welcome to use!
