

12 Days of Christmas

On the first day of Christmas, my post doc went to see:
A 10-meter in a Lick dome!

On the second day of Christmas, my post doc went to see:
Two spectrographs, And a 10-meter in a Lick dome!

On the third day of Christmas, my post doc went to see:
Three slit plates, Two spectrographs,
And a 10-meter in a Lick dome!

On the fourth day of Christmas, my post doc went to see:
Four filter wheels, Three slit plates,
Two spectrographs, And a 3-meter in a Lick dome!

On the fifth day of Christmas, my post doc went to see:
Five C-C-D-s, Four filter wheels, Three slit plates,
Two spectrographs, And a 10-meter in a Lick dome!

On the sixth day of Christmas, my post doc went to see:
Six frames displaying, Five C-C-D-s, Four filter wheels,
Three slit plates, Two spectrographs,
And a 10-meter in a Lick dome!

On the seventh day of Christmas, my post doc went to see:
Seven flats dividing, Six frames displaying, Five C-C-D-s,
Four filter wheels, Three slit plates, Two spectrographs,
And a 10-meter in a Lick dome!

On the eighth day of Christmas, my post doc went to see:
Eight darks subtracting, Seven flats dividing,
Six frames displaying, Five C-C-D-s, Four filter wheels,
Three slit plates, Two spectrographs,
And a 10-meter in a Lick dome!

On the ninth day of Christmas, my post doc went to see:
Nine spectra tracing, Eight darks subtracting,
Seven flats dividing, Six frames displaying, Five C-C-D-s,
Four filter wheels, Three slit plates, Two spectrographs,
And a 10-meter in a Lick dome!

On the tenth day of Christmas, my post doc went to see:
Ten clocks a-clocking, Nine spectra tracing,
Eight darks subtracting, Seven flats dividing,
Six frames displaying, Five C-C-D-s, Four filter wheels,
Three slit plates, Two spectrographs,
And a 10-meter in a Lick dome!

On the eleventh day of Christmas, my post doc went to see:
Eleven regions reading, ten clocks a-clocking,
Nine spectra tracing, Eight darks subtracting,

Seven flats dividing, Six frames displaying,
Five C-C-D-s, Four filter wheels, Three slit plates,
Two spectrographs,
And a 10-meter in a Lick dome!

On the twelfth day of Christmas, my post doc went to see:
Twelve shutters shutting, Eleven regions reading,
Ten clocks a-clocking, Nine spectra tracing,
Eight darks subtracting, Seven flats dividing,
Six frames displaying, Five C-C-D-s, Four filter wheels,
Three slit plates, Two spectrographs,
And a 10-meter in a Keck dome!
