MAJOR ACTIVITIES/ACHIEVEMENTS

1. Galaxy formation at high redshift (from $z \sim 4-8$ and now to $z \sim 10$), plus galaxy evolution at $z \sim 1$. Graduate students and postdocs plus major *Hubble Space Telescope (HST)*, *Spitzer*,

Keck, VLT and Magellan collaborations. Numerous talks at international workshops on galaxy evolution in the first 1–2 billion yr. Highly visited “firstgalaxies” website is #1 in Google search.

2. PI of HUDF09 *HST* WFC3/IR program—top-ranked and largest program awarded by Cycle 17 *HST* TAC. ~15 team papers in 1.5 yr from fall 2009. Many press releases and interviews.
3. Chair, ESO Visiting Committee 2010. Led committee on site visits to Garching and Chile; extensive interviews; editor/writer of 70 page report; presentation to DG and to ESO Council.
4. Scientist Member, 2010, *James Webb Space Telescope* Independent Comprehensive Review Panel (ICRP). Only scientist on committee set up by NASA Administrator at request of Senator Mikulski to assess *JWST* situation. Intense effort with reviews, interviews and document assessments. Played a key role along with Chair John Casani in report preparation and presentations to NASA Administrator and senior staff, OMB/OSTP and Congressional (House and Senate) Appropriations staff.
5. Chair, Congressionally chartered Astronomy and Astrophysics Advisory Committee (AAAC) from 2004–2008. AAAC is FACA committee whose annual report is to NSF, NASA and DOE, to Congress and to OMB/OSTP. While Chair I set up four major Task Force studies: Exo-Planets; Dark Energy; CMB Polarization; Dark Matter Direct Detection. Large extensive annual report for Chair as editor/coordinator/writer.
6. Chair, Co-chair, 2009–2011, Thirty Meter Telescope (TMT) Science Advisory Committee (SAC).
7. Chair, from 2009, *James Webb Space Telescope* Science Advisory Committee (JSTAC). I was one of original initiators of *JWST* concept—Next Generation Space Telescope—in 1988–1992.
8. Deputy PI, *HST* Advanced Camera for Surveys (ACS): Successful completion and launch of most powerful optical imager on the *Hubble Space Telescope*. Improved *HST*'s performance by 10X.
9. Co-organizer, major workshop (“*Hubble*'s Science Legacy”) on science issues and technical challenges for a large space telescope successor to *HST*. PI of large study proposal on same topic with scientists/engineers/astronauts from universities, NASA centers and industry.
